6.6.6 colour code [[7,1,3]], 3 rounds, 10 ions

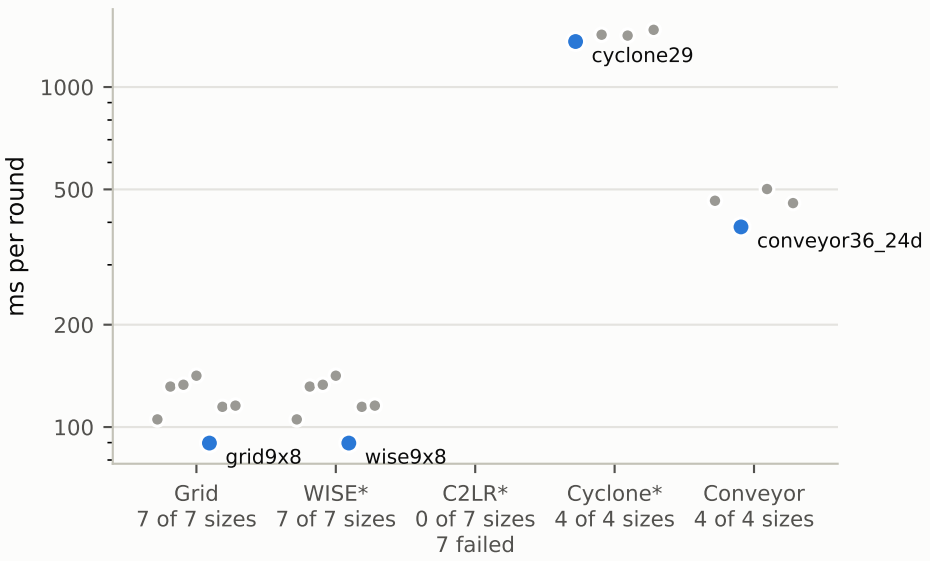

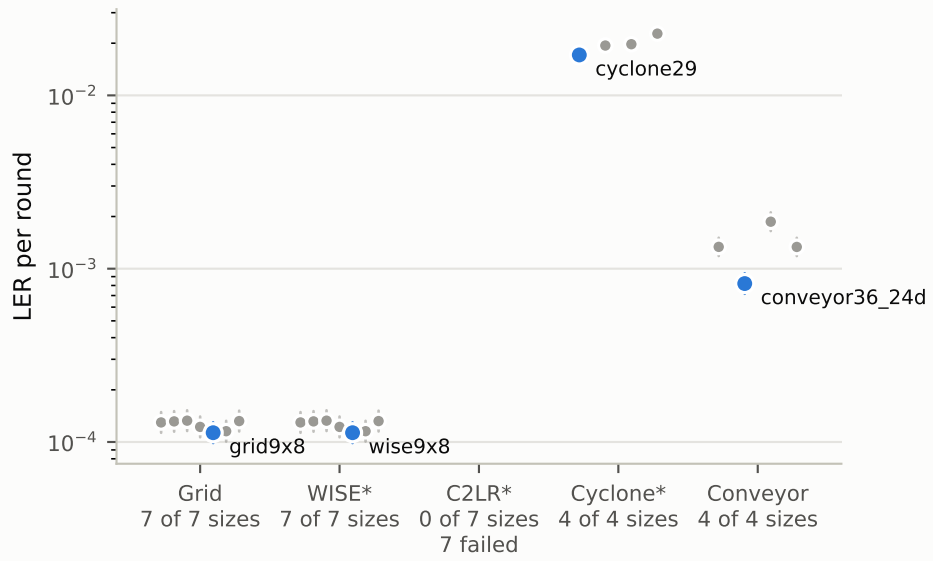

6.6.6 colour code [[19,1,5]], 5 rounds, 28 ions

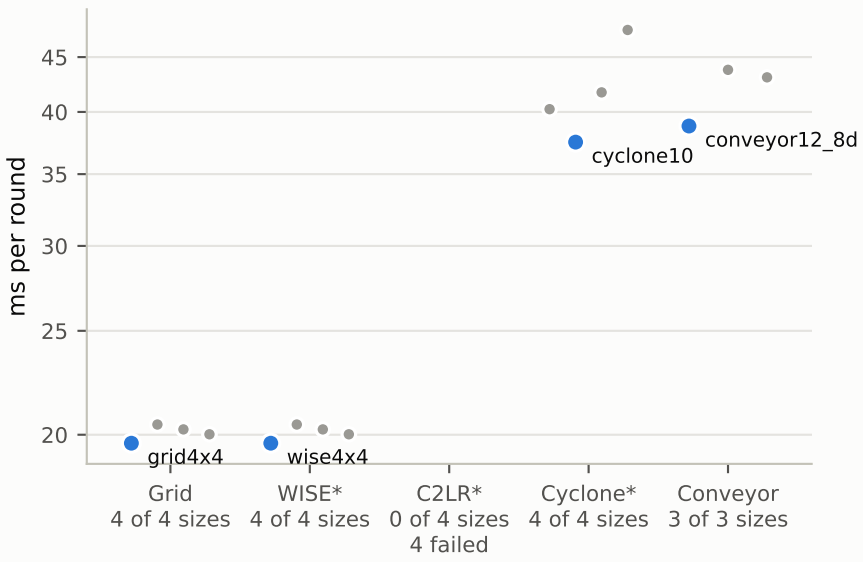

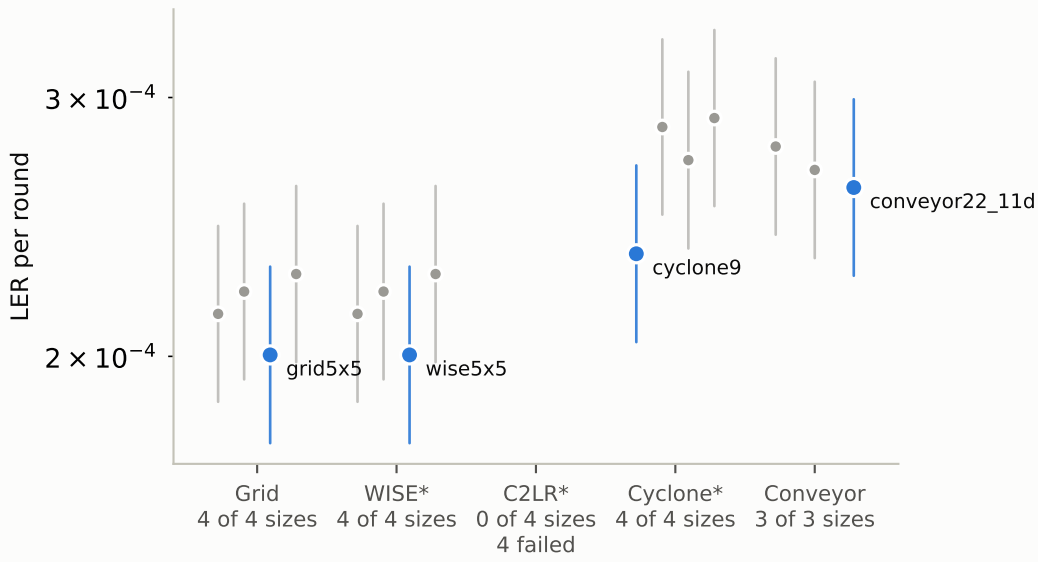

6.6.6 colour code [[37,1,7]], 7 rounds, 55 ions

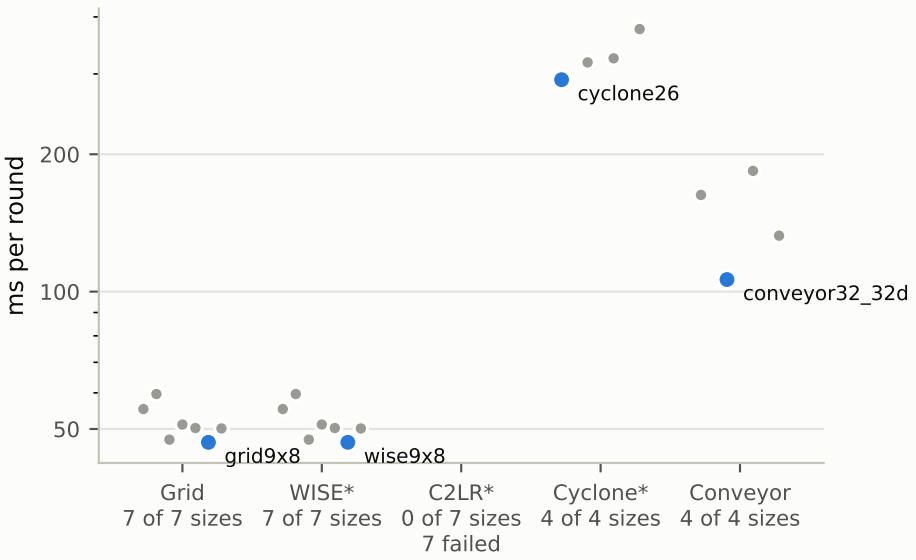

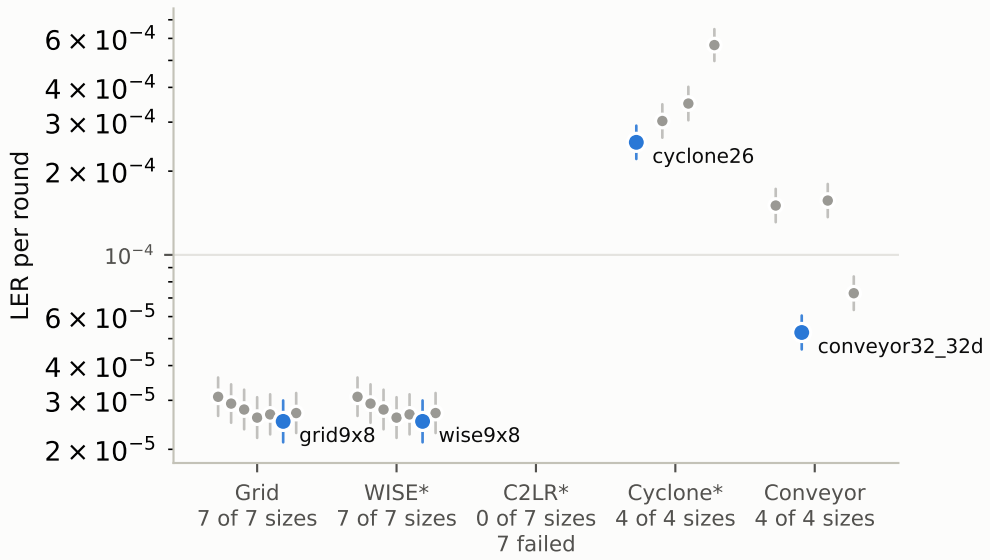

rotated surface code [[9,1,3]], 3 rounds, 17 ions

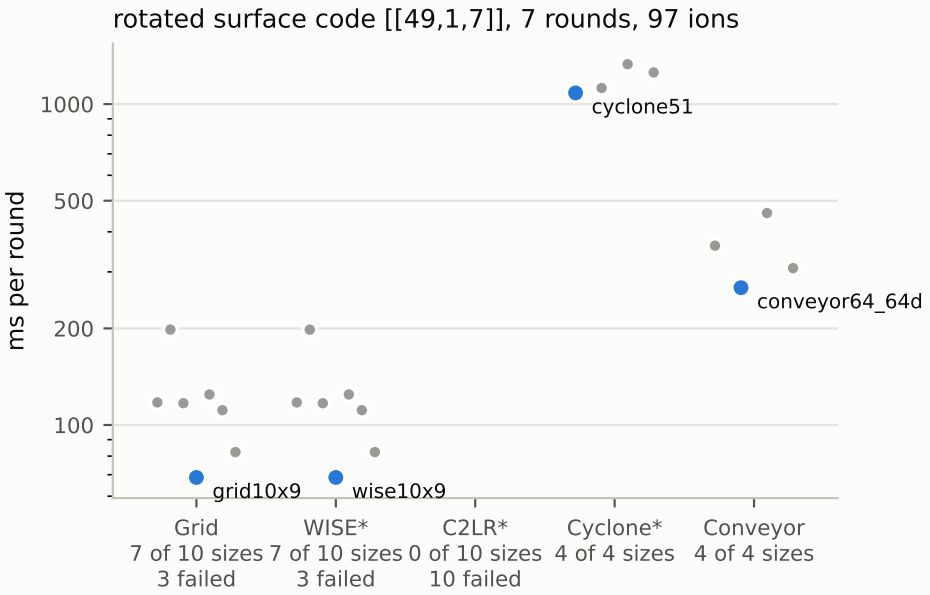

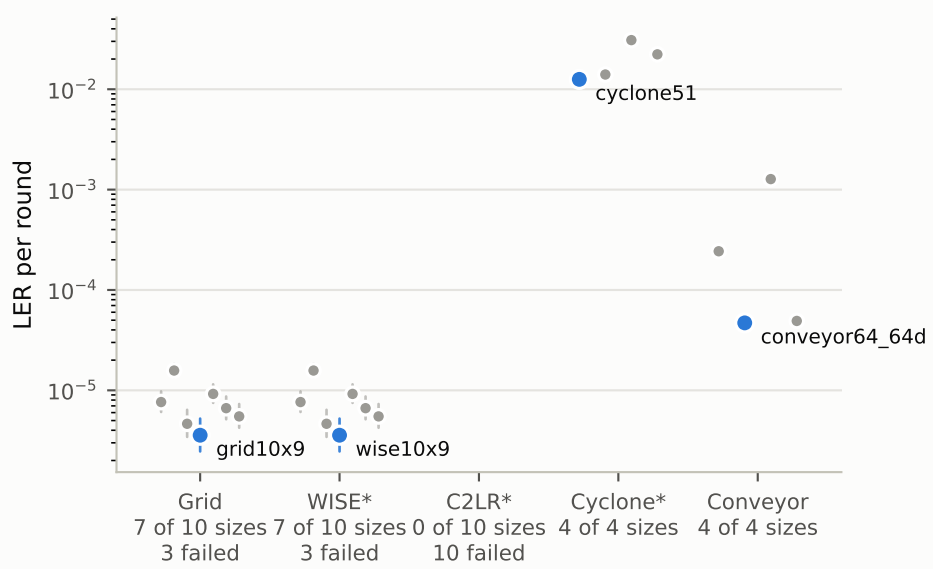

rotated surface code [[25,1,5]], 5 rounds, 49 ions

rotated surface code [[49,1,7]], 7 rounds, 97 ions

* WISE: same program and time as Grid until WISE's broadcast rules exist
* C2LR: the reference compiler moves ions by plain shuttles, which a swap-or-stay device does not offer (R4, C1): every size fails until a C2LR router exists
* Cyclone: compiled without rigid rotation (qccdc has no Cyclone scheduler yet): an upper bound
